How to switch the oven on

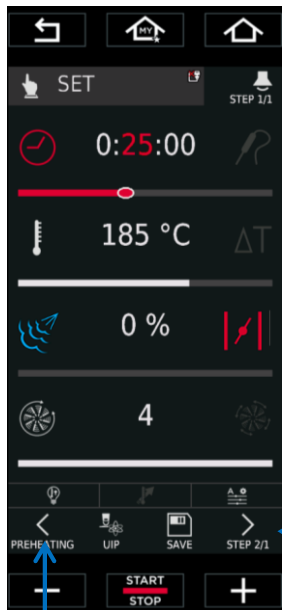

Lift the flap and press the button on the left hand side.
The control panel screen will flicker and boot up.

How to set a program

Select SET from the main menu.

Set the cooking time using the horizontal bar or the + and - buttons or keep pressing the - button to set INFINITY

Set the cooking temperature using the horizontal bar or the + and - buttons.

If required, press STEAM.Maxi to add steam.
If required, press DRY.Maxi to extract humidity.
Adjust the amount of steam or dry air with the horizontal bar or + and - buttons.

Set the air flow speed using the horizontal bar or the + and - buttons.

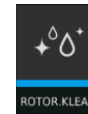

Click here to add a cooking step if required.

When preheating and all steps are set click here to save the program or press START/STOP to launch the program.

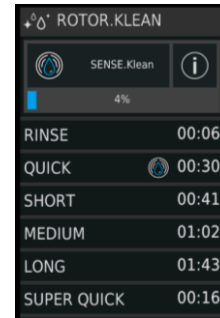

Click here to go to the screen to set the preheating.

How to wash the oven

Select ROTOR.KLEAN from the main menu.

Select the required washing program

SENSE.Klean will suggest an appropriate wash cycle according to what the oven has been used for.

Press START/STOP to launch the program.

Always use Unox DET&Rinse PLUS detergent to clean your Unox MIND.Maps™ oven.

This is concentrated detergent and rinse aid in one product and is loaded directly into the detergent tray under the oven as shown in these images.

Useful hints and tips

- To stop the oven at any point press and hold START/STOP until the oven beeps and returns to the home page.
- If the screen is blank it is probably just on standby, the oven will still be on and working, just tap the screen and it will come out of standby.
- When setting time, and temperature press the line and then use the + and - buttons to reach the exact number that you require.
- If you can't get off the MULTI.TIME or MISE EN PLACE screens, press and hold START/STOP until it beeps and then you can return to the home page and set a program as normal.
- Make sure you keep the door seal clean at all times and frequently clean the door handle with sanitizing spray.
